

Dear Fellow Community Members,

As a healthcare provider during these times of uncertainty we would like to say thank you for all those on the front lines and know that you are appreciated. We remain open at this time as an essential medical provider in order to help assist our patient's in their time of need. Chronic pain, falling at home, unplanned accidents, and other unknown life events resulting in injury continue despite issues during this pandemic. So, if anyone in the community needs to be referred for outpatient physical therapy services we are here for everyone while taking all necessary precautions for patient and employee safety.

Also, we are looking to deploy a virtual health platform in the near future and I will follow up with more information regarding this service when it becomes available.

If you have any questions or concerns in which we can assist please do not hesitate to contact any of our clinics for assistance.

Respectfully,

Matthew T. Freije, DPT
